

## Printing Soil Survey Maps

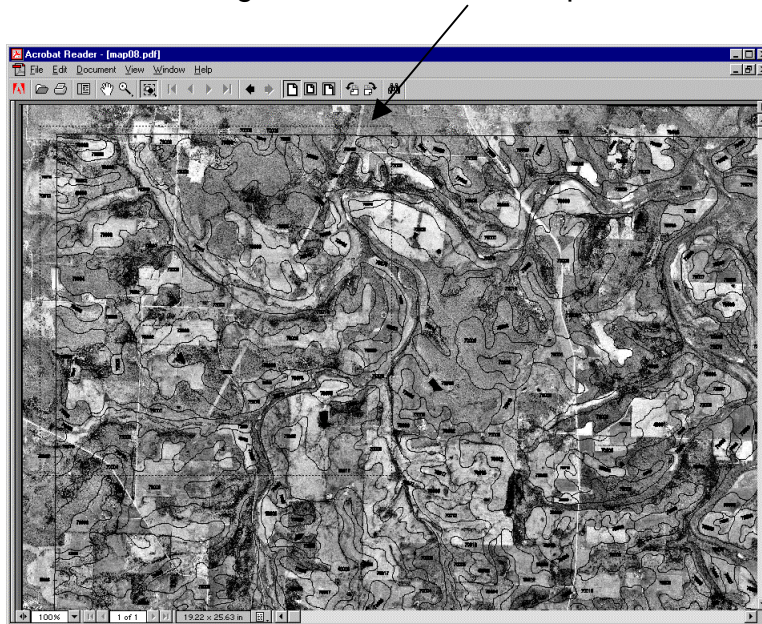

The soil survey maps were made at a scale of 1:12000 and were designed to be used at that scale. To print the maps at 1:12000 scale, set the view to Actual Size from the View pull down menu.

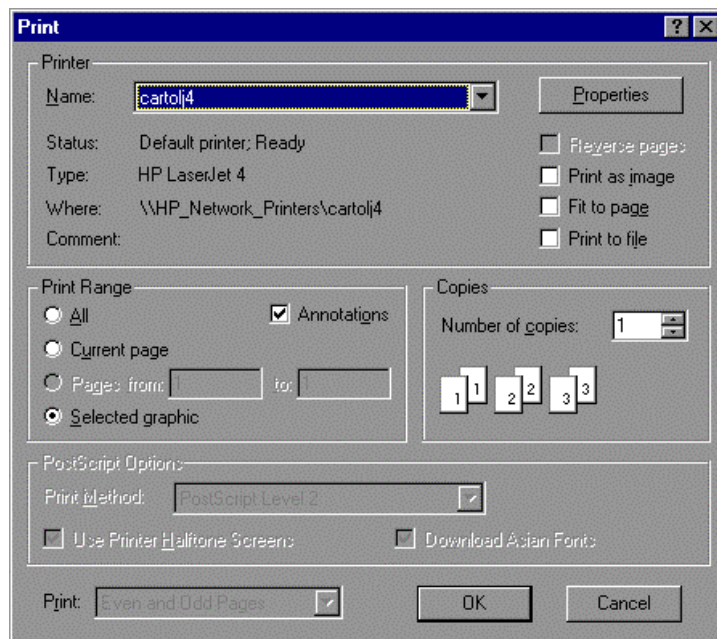

Using the pan tool, go to the area you would like to print. Select the Graphic Selection Tool by holding down the Text Selection Tool button and clicking on the Graphic Selection Tool button (this may take a few seconds).

Then using the Graphic Selection Tool drag a box around the area you would like to print. Note dashed lines forming a box around area to print.

Select File Print. The Print Range will be set to Selected graphic. Check to see that neither "Fit to Page" or "Print to File" is selected. Click OK and the map will be sent to the printer.

Note: The Graphics Selection Tool can be used to copy an area to the clipboard for use in other applications.
